

# European Parliament Elections 2009

RESEARCH PAPER 09/53 17 June 2009

Elections to the European Parliament were held across the 27 states of the European Union between 4 and 7 June 2009.

The UK elections were held concurrently with the county council elections in England on 4 June. The UK now has 72 MEPs, down from 78 at the last election, distributed between 12 regions.

The Conservatives won 25 seats, both UKIP and Labour 13 and the Liberal Democrats 11. The Green Party held their two seats, while the BNP won their first two seats in the European parliament. Labour lost five seats compared with the comparative pre-election position.

The Conservatives won the popular vote overall, and every region in Great Britain except the North East, where Labour won, and Scotland, where the SNP won. UKIP won more votes than Labour. UK turnout was 34.5%.

Across Europe, centre-right parties, whether in power or opposition, tended to perform better than those on the centre-left. The exact political balance of the new Parliament depends on the formation of Groups. The UK was not alone in seeing gains for far-right and nationalistic parties.

Turnout across the EU was 43%. It was particularly low in some of the newer Member States.

Part 1 of this paper presents the full results of the UK elections, including regional analysis and local-level data.

Part 2 presents summary results of the results across the EU, together with country-level summaries based on data from official national sources.

## Summary

Elections to the European Parliament were held across the 27 states of the European Union between 4 and 7 June 2009.

### Results in the UK

- The UK elections were held concurrently with county council elections in England on 4 June. The UK now has 72 MEPs, down from 78 at the last election, distributed between 12 regions.
- The Conservatives won 25 seats, both UKIP and Labour 13 and the Liberal Democrats 11. The Green Party held their two seats, while the BNP won their first two seats in the European Parliament. Labour lost five seats compared with the comparative pre-election position.
- Across Great Britain, the Conservatives were first with 27.7% of the vote. UKIP came second, ahead of Labour and the Liberal Democrats.
- The Conservatives won the popular vote in Wales, while the SNP came first in Scotland. The Conservatives were first in every English region except the North East, where Labour won the most votes. Sinn Féin won the most first preference votes in Northern Ireland.
- Labour's vote fell by 6.9% points compared with the 2004 election. The principal beneficiaries were the minor parties, with Conservative, UKIP and Liberal Democrat shares remaining little changed.
- The Conservatives won the most votes in 280 of the 399 of local areas in Great Britain for which data are available. Labour won in 66, the Liberal Democrats 12 and UKIP 9. The SNP was first in 22 of 32 council areas in Scotland, while Plaid Cymru was first in seven of 40 Welsh constituencies. The Green Party was first in Brighton, Norwich and Oxford. The BNP was second in Barking & Dagenham.
- UK turnout was 34.5%, down on the 38.4% in 2004, when four regions held all-postal ballots, but higher than in 1999.

### Results across the EU

- MEPs from different countries are elected from national parties, but in the European Parliament many join political groups; after the 2009 elections the largest of these is likely to remain the centre-right European People's Party. The second largest group is the centre-left Party of European Socialists and this is likely to be smaller than prior to the elections. It is possible that new groups and allegiances may come into place in the new Parliament – particularly in the light of the decision for the UK Conservatives to leave their former EPP Group.
- Across Europe, centre-right parties, whether in power or opposition, tended to perform better than those on the centre-left. The UK was not alone in seeing gains for far-right and nationalistic parties.
- Turnout across the EU was 43%. It was particularly low in some of the newer Member States.
- The proportion of women MEPs has continued to rise and in three countries (Latvia, Sweden and Finland) over half of MEPs are women.

# 1 Results in the United Kingdom

## 1.1 Results summary

Elections to the European Parliament were held across the UK on 4 June 2009, concurrently with county council elections in England. The first UK results were announced on 7 June 2009, once polls had closed across Europe.

**UK MEPs by party**

The Conservatives won 25 seats, both UKIP and Labour 13, and the Liberal Democrats 11. Other parties took the remaining 10 seats, including the BNP's first two seats in the European Parliament.

**UK seats won at European Parliament elections 1999-2009**

72 seats were contested in the UK, down from 87 in 1999 and 78 in 2004 as the EU has grown. Adjusting for the reduction in the UK's allocation compared with 2004, Labour lost five seats, the BNP gained two, and the Conservatives, Liberal Democrats and UKIP each gained one.

The table overleaf summarises changes in the number of seats allocated to each UK region. The 72 seats were allocated between regions in proportion to their electorates on 1 December 2006, with each region having a minimum of three seats.

The charts below show shares of the vote for each party and changes since both the 2004 European Parliament elections and the 2005 General Election:

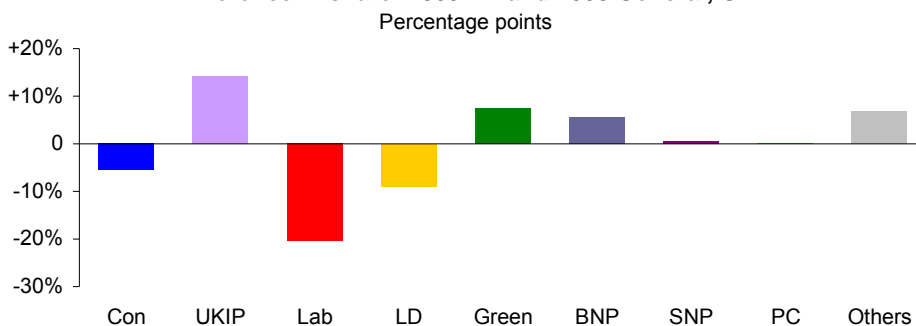

**Share of the vote: Great Britain**

**Change in share: 2009 and 2004 EP elections, GB**

**Difference in share: 2009 EP and 2005 General, GB**

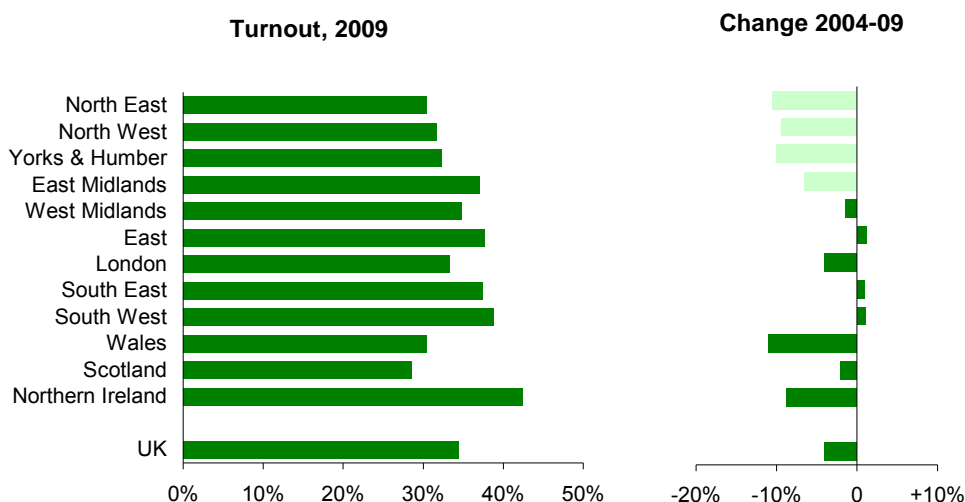

- The Conservatives won the popular vote across Great Britain, polling 4.2 million votes. UKIP were second with 2.5 million votes, Labour third with 2.4 million and the Liberal Democrats fourth with 2.1 million. The Green Party won 1.3 million votes and the BNP nearly 950,000.
- The Labour share of the vote fell by 6.9% points compared to the 2004 European Parliament elections. The shares for the other larger parties changed very little, with smaller parties including the Greens and the BNP gaining.
- The comparisons with the last General Election are more marked: the Labour share was more than 20% points lower, while the UKIP share was more than 14% points higher. It should be borne in mind that different electoral systems are used.

## 1.2 Turnout

Turnout across the UK (measured as valid votes as a proportion of the electorate) was **34.5%**. This was down on the 38.4% in 2004, when all-postal ballots were held in the four northernmost regions of England, but well above the 24.0% in 1999.

The chart below shows turnout and change in turnout by region. The changes shown in light green are comparisons with all-postal ballots in 2004.

- Regional turnouts ranged from 42.4% in Northern Ireland to 28.5% in Scotland.
- Turnout fell sharply in each of the four regions that held all-postal ballots in 2004. It also fell by 10.9% points in Wales, where local elections were held concurrently in 2004.
- Turnout rose slightly in the East, South East and South West regions.
- The highest local turnouts were in the Isles of Scilly (53.8%) and Gibraltar (52.6%). Turnout in South Lakeland district was 50.0%.
- The lowest local turnouts were 20.7% in Kingston-upon-Hull council area and 20.9% in Islwyn constituency.

### 1.3 The d'Hondt system

European Parliament seats in Great Britain are allocated using the d'Hondt system of proportional representation at regional level. It operates as follows:

- Seats are allocated in successive rounds, with one seat allocated in each round
- In each round, total votes for each party are divided by the number of seats the party has already won, plus one
- The party with the highest remaining total wins the seat.

This is demonstrated below using the results from Scotland:

**Seat allocation: Scotland**

	SNP	Lab	Con	LD	Green	UKIP
<b>Votes</b>	<b>321,007</b>	<b>229,853</b>	<b>185,794</b>	<b>127,038</b>	<b>80,442</b>	<b>57,788</b>
Round 1	321,007	229,853	185,794	127,038	80,442	57,788
Round 2	160,504	229,853	185,794	127,038	80,442	57,788
Round 3	160,504	114,927	185,794	127,038	80,442	57,788
Round 4	160,504	114,927	92,897	127,038	80,442	57,788

Round 6	107,002	114,927	92,897	63,519	80,442	57,788
<b>Seats</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>1</b>	<b>0</b>	<b>0</b>

Scotland returns six MEPs. They are allocated in six rounds as follows:

- Round 1:* The SNP won the most votes in Scotland, and takes the first seat
- Round 2:* The SNP vote is divided by two, reflecting their seat won in Round 1. Labour has the highest remaining total and takes the second seat
- Round 3:* Both the SNP and Labour votes are now divided by two. The Conservative total is now the highest
- Round 4:* Half the SNP vote exceeds the Liberal Democrat vote, so the SNP takes a second seat
- Round 5:* The SNP vote is now divided by three, reflecting their two seats won. The Liberal Democrats take the fifth seat
- Round 6:* Labour takes the final seat

This system was used to allocate seats in Great Britain at the 1999 and 2004 European Parliament elections. At the 1979, 1984, 1989 and 1994 elections, there was a first-past-the-post system, like that used for UK general elections but with larger European constituencies.

Northern Ireland uses a different system to the rest of the UK for allocating its three MEPs. The single transferable vote system (STV) reallocates the surplus votes of those already elected and the votes of those eliminated to remaining candidates. This system has been used in Northern Ireland at each European Parliament election.

Note: changes in seats won are adjusted for the reduction in the UK's allocation from 78 to 72

- The Conservatives won the popular vote across Great Britain by 11.2% points and gained one seat.
- Labour were beaten into third by UKIP. Labour won 1.3 million fewer votes than in 2004 and lost five MEPs
- UKIP gained one seat in net terms with a marginally higher share of the vote than in 2004. The Liberal Democrats also gained one seat on a comparable basis, despite polling a lower vote share.
- All four of the major national parties polled fewer votes than in 2004.
- The Greens held their two seats with an improved vote share. The BNP won two seats, their first in the European Parliament. They won 135,000 more votes than in 2004.

## 1.5 Results at local level

Although the allocation of UK seats to the European Parliament takes place on a regional basis, the results are collected at local level in Great Britain. They are available for the following geographies:

*England:* Lower-tier council areas: districts, unitary authorities, metropolitan boroughs and London boroughs  
*Wales:* Westminster Parliamentary constituencies  
*Scotland:* Unitary council areas

The results have been collected from regional and local returning officers.

The table below summarises which parties won the most votes in these areas. It should be noted that they vary enormously in size: Birmingham's electorate is over 700,000 while the Isles of Scilly's is less than 1,700.

- Plaid Cymru were the largest party in seven Welsh constituencies. Their 49.5% in Caernarfon was the second highest for any party in any local area, after the Conservatives in Gibraltar.

# European Parliament Elections 2009

## Parties with largest vote shares at local level

Lower-tier council areas in England, Westminster constituencies in Wales, unitary council areas in Scotland

- The Green Party took the highest share of the vote in three areas: Brighton, Oxford and Norwich. They polled 31.4% in Brighton, their highest local vote share.
- Despite winning two seats in the European Parliament, the BNP's highest local area placing was second in Barking & Dagenham, where they gained 19.4%. They won 17.7% in Stoke-on-Trent and 17.6% in Thurrock.
- The English Democrats received 9.4% percent of the vote in Doncaster, where the English Democrat candidate was elected Mayor on the same day. They also won 9.4% in Dartford, where they were the fourth largest party.

Appendix 1 contains the full results at local level.

 In Belgium, Luxembourg, Cyprus and Malta voting is compulsory; this was also the case in Italy up to 1992

2009 European Election turnout by country

- EU-wide turnout<sup>1</sup> continued to decline in 2009 to 43%, from 45% in 2004, 50% in 1999 and 62% when the EU was far smaller in 1979.
- Turnout in the UK at European Parliament elections has consistently been low by comparison with other European countries. Its 35% turnout in 2009 was the lowest of “established” EU Members, although it was higher than in six of the newer member states, including Slovakia, where fewer than one-in-five electors voted.

## 2.2 Seats in the European Parliament

After the 2009 elections there are 736 Members of the European Parliament. Previously, at the 2004 elections, 732 Members had been elected. The accession of Bulgaria and Romania had increased that to 785 MEPs immediately before the 2009 elections.

The smallest country, Malta, now has 5 MEPs. This increases broadly in line with population, up to the largest, Germany, which has 99. The UK, Italy and France have 72 MEPs each. MEPs generally stand for election as representatives of a national party. However, once in the Parliament they can form political groups which draw members from the delegations of a number of countries. Labour MEPs, for example, were in the Party of European Socialists; Conservative MEPs, were in the European People’s Party group but have already indicated they will not be in this group in future.

Before the 2009 elections there were seven political groups in the Parliament:

	EPP-ED	European People's Party and European Democrats
	PES	Party of European Socialists
	ALDE	Alliance of Liberals and Democrats
	UEN	Union for Europe of Nations
	GREENS/ EFA	Greens/European Free Alliance
	GUE/ NGL	European United Left/Nordic Green Left
	IND/ DEM	Independence/Democracy

From July 2009, all political groups must include a total of at least 25 MEPs from at least seven Member States.

The following table shows the European Parliament’s provisional composition of each country’s MEPs in terms of known affiliations to existing political groups. This is subject to agreement when the Parliament first meets in Strasbourg on 14 July 2009, the formation of new groups and possible demise of some of the existing ones.

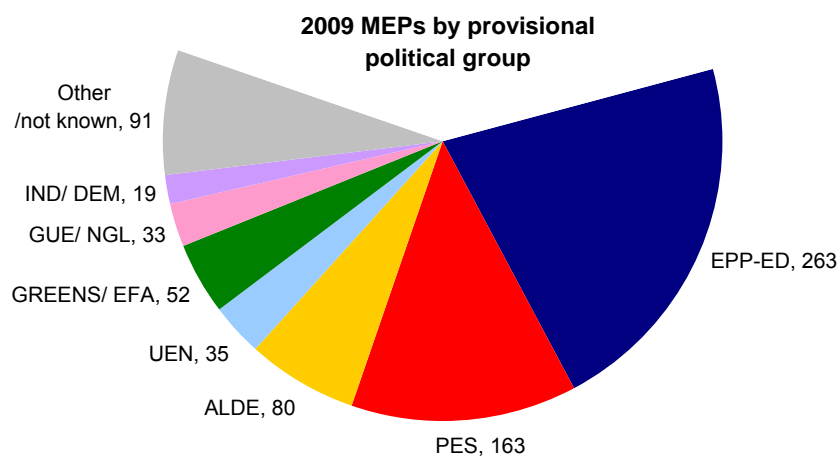

---

<sup>1</sup> The calculation of turnout here is largely based on total votes (valid and rejected) as a proportion of the electorate as this is the figure that is reported by the European Parliament for consistency between countries. Detailed results elsewhere in this paper show turnout on this basis and using valid votes only.

Overall, on the basis of the current groups, the EPP remains the largest group, with an increase in its share of seats. The Socialists are the second largest but are reduced from 28% to 22% of MEPs, while the Alliance of Liberals and Democrats also lost seats.

However, this position is subject to change when the Parliament meets in July, especially as new groups may be formed and the “other/not known” category includes 91 MEPs who may subsequently affiliate to groups.

Women MEPs have grown from around 1 in 6 of all MEPs in 1979 to just over 1 in 3 in 2009. For the first time, the majority of some countries' MEPs is female. 63% of Latvia's MEPs are women, as are 62% of Finland's and 56% of Sweden's.

## 2.4 Country-level analysis

The following sections summarise the votes and seats for each of the 27 EU Member states. Political groups have been assigned provisionally by the European Parliament. Changes in the number of MEPs by party show the number of MEPs elected in 2009 compared with the hypothetical number in the previous parliament after adjusting for the change in the number of seats.

The data for these tables has been taken primarily from official national authorities, as shown under each country. Additional data are from the European Parliament and BBC.
